

# The new way to stay safe on your stairs.

An introduction to the *new* UP Stair Lift.

**AmeriGlide**  
ACCESSIBILITY SOLUTIONS

# UP Stair Lift Features

## Intercom

In case of an emergency, it is possible to reach our service desk with the push of a button.\*

## Foldable Arm Rests

Space is important when purchasing a stair lift. The UP stair lift ensures a slim design because of the foldable arm rests.

## Foldable Seat

From comfort to a slim design with the foldable leather seat which is available in many different colors.

## Automatic Swivel

The seat is equipped with an automatic swivel function. This makes it easy to get on and off the seat.

## Automatic Footrest

Besides folding automatically after every use, the footrest also ensures that the stair lift will stop when something blocks the stair lift (ie. toy or purse on stairs.)

\*Option available by choosing the annual service option.

## Custom Fit Rail for Any Stair Shape

The rail system of the UP Stair lift consists of 2 parts. **Only pre-made rail sections and bends are used.**

This ensures no matter what your staircase looks like, the material used is *always* in stock and any rail shape can be created.

The entire stair lift can be installed quickly and no factory intervention is necessary. Compared to commonly used rails, the rail has a considerably smaller profile as well, which ensures your staircase is not blocked.

**Furthermore, the rail is made from aluminum and when exhausted still 100% recyclable.**

## Color Options

The UP Stair Lift can be customized to fit your style. Below are the color options available for the UP stair lift.

Cognac

Sand

# Unique Features

## Quick Installation

Quick installation and adjustments are possible thanks to the modular rail and patented curved sections. Within a few hours the entire stair lift can be installed.

## Easy Relocation

The stair lift can be easily relocated. All parts of the rail can easily be converted to a new shape and can, if necessary, without any problems, be combined with new rail elements. So, if you need to move house, you can take the stair lift with you!

## Recyclable Material

UP stair lifts are 100% recyclable and reusable! This eliminates the amount of product going into the trash every year.

## Fits Both Curved and Straight Staircases

Because of the modular construction, the UP stair lift can fit both curved and straight staircases. On a curved staircase, the stair lift can be placed on the inside or outside.

## All in One Package

Other stair lift suppliers offer rail lighting, automatic swivel seats and foot plates as an option. For us, this is a standard on the UP stair lift. In addition, you will get a stylish seat with different color options to choose from.

## Remote Service

The stair lift is able to report the maintenance status and any problems via the integrated Wi-Fi connection. This means that most difficulties can be solved remotely.

 275lbs.  
 Modular rail,  
 extruded aluminum,  
 casted aluminum

**Power Supply**

50-60Hz, 90-240V AC

# Rail Options

## Horizontal

When you want to keep space on the stairs, it is possible to park the stair lift further from the stairs by using the horizontal end piece.

## Automatic Hinge Rail

If the other options are taking up too much space, you can choose the option for a hinge rail. The hinge rail folds automatically after use.

## Drop Nose

The drop nose end piece ensures a compact rail because it is running down steeply.

## 180° Parking Curve

With the 180° parking curve, the stair lift will be able to park itself alongside the stairs, or behind a wall. A convenient feature to save space.

## 90° Parking Curve

Due to the modular rail parts, curves can be made easily. With the 90° parking curve the stair lift will be parked next to the stairs.
